

LAUNCHING 2026

AccuBook

The complete business platform for Indian companies.

Accounting · GST compliance · Payroll & HR · Inventory · Manufacturing

THE PROBLEM

Four systems. Four bills. One set of books.

A growing Indian business ends up buying its software one problem at a time — and nothing talks to anything else.

- **Desktop accounting** locked to one machine in one office, extra billing for remote access.
- **A separate payroll platform** salary data re-keyed into the books every month.
- **A separate compliance tool** for GST filing and reconciliation.
- **Spreadsheets** holding together everything the three systems don't cover.

The result: ₹93,000+ a year, three to four vendors, and numbers that never quite reconcile.

THE PRODUCT

One platform. Every function. One ledger.

Everything posts to the same books in real time — no exports, no imports, no month-end reconciliation between vendors.

Accounting General ledger, vouchers, multi-year books	GST returns GSTR-1, 3B, 9 and 2B reconciliation	E-invoice IRN and e-way bill generation	TDS / TCS Section rules, Form 16A and 27D
Banking Statement import and auto-reconciliation	Inventory Multi-warehouse, weighted average costing	Manufacturing Bill of materials, work orders, WIP	Payroll & HR PF, ESI, PT, TDS, attendance, leave

Also included on every plan: multi-branch, approval workflows, role permissions, full audit trail and a REST API.

WHO IT'S FOR

Built for the businesses that outgrew their books

Four kinds of company get the most out of AccuBook — usually the ones now running accounting, payroll and stock in three different places.

TRADING & DISTRIBUTION

**Wholesalers, distributors
and C&F agents**

Multi-warehouse stock, party ledgers and ageing, GST on every movement.

MANUFACTURING

**Job shops, fabricators,
food
and FMCG processors**

Bill of materials, work orders, WIP and true cost per finished unit.

SERVICES & PROFESSIONAL

**Agencies, consultancies
and IT firms**

Project and cost-centre accounting, recurring billing, TDS on every payment.

MULTI-BRANCH & RETAIL

**Chains, franchises and
multi-location businesses**

Branch-wise books, approval chains and consolidated reporting.

Best fit: ₹2 crore to ₹100 crore turnover, 5 to 100 people — running accounting, payroll and stock in three different places.

One system instead of four

Because every module writes to the same ledger, the work that normally happens between systems simply disappears.

- **Payroll posts itself.** Run the month and the salary journal, PF, ESI, PT and TDS entries are already in the books.
- **Stock revalues itself.** Every goods receipt recomputes weighted-average cost and hits the stock ledger.
- **Returns build themselves.** GST returns are computed from the invoices you already raised, not re-entered.
- **One login, one audit trail.** Who changed what, when — across accounting, stock, payroll and approvals.

No exports. No re-keying. No month-end spent making two systems agree.

Indian compliance is the product, not an add-on

Built for the statutory calendar an Indian finance team actually works to.

- **GSTR-1, 3B and 9**

computed from your books, exported as portal-ready JSON.

- **GSTR-2B reconciliation**

match supplier filings against your purchase register automatically.

- **E-invoice and e-way bill**

IRN payload and e-way documents generated from the invoice.

- **TDS and TCS**

section-wise rules, thresholds, and Form 16A / 27D generation.

- **Payroll statutory**

PF, ESI, professional tax and TDS — posted straight to the ledger.

- **Place-of-supply GST**

CGST, SGST and IGST split correctly on every single invoice.

Statutory updates are included — never held behind a separate renewal.

Cloud, without the asterisk

Not a desktop product with remote access bolted on, and not a hosting bill that grows with every user you add.

Any device

A browser is the whole requirement.

Office, home, factory or phone —
the same live books.

Every user, always

Concurrent access included. No
per-seat hosting charge, no server
sitting in the back office.

Safe by default

Role-based permissions, approval
chains and a complete audit trail
on every plan.

Nothing to install. Nothing to back up. Nothing to renew before you can log in.

Switching takes a week, not a quarter

The reason businesses stay on software they have outgrown is the fear of moving. We removed it.

01

Import

Your existing masters, ledgers, parties, stock items and vouchers come across automatically. Included free.

02

Reconcile

We match your trial balance to the rupee as on your chosen cut-off date, before anyone goes live.

03

Go live

Training for your team, then you start billing. Typical go-live is one week from handover of data.

Go-live means one thing in our contract: your trial balance matches, to the rupee.

THE COMPARISON

What the same capability costs today

Annual cost for a 25-person business. Perpetual licences shown as their true annual cost over three years. All figures exclude GST.

What you need	What the market charges	AccuBook
Accounting, GST billing, books	₹10,500 – ₹10,800 / year	₹4,800 / year
GST returns and 2B reconciliation	Compliance suites, quoted separately	Included
Payroll, PF / ESI / PT / TDS	₹12,000 – ₹84,000 / year	Included
Attendance, leave, expense claims	₹30,000 – ₹84,000 / year	Included
Multi-warehouse inventory	₹8,100 – ₹31,500 / year	₹12,000 / year
Manufacturing — BOM, work orders	₹2,67,000 / year + ₹3–25 lakh setup	₹30,000 / year
Cloud access for every user	Billed per user, per month	Included
Everything above, one business	₹93,000+ across 3–4 vendors	₹30,000, one product

Market pricing verified August 2026 from published vendor rate cards. Competitor figures move with the fiscal year.

PRICING

Priced per business, not per user

Billed annually, excluding GST. Add users and branches without changing plans.

STARTER ₹4,800 per year 3 users, 1 branch GST billing and returns Banking and reconciliation Free data migration	GROWTH ₹12,000 per year 10 users, 3 branches Everything in Starter E-invoice, TDS/TCS, GSTR-9 Payroll up to 25 staff	BUSINESS ₹30,000 per year 25 users, unlimited branches Manufacturing and BOM Payroll up to 100 staff REST API and custom reports	ENTERPRISE ₹90,000+ quoted Unlimited users and entities Group consolidation, SSO Dedicated database and SLA Named account manager
--	--	--	---

One-time deployment: free self-serve on Starter · ₹18,000 on Growth · ₹45,000 on Business. Covers setup, data migration, opening balances and training.

**One platform.
Every compliance requirement.
A third of the cost.**

Book a walkthrough on your own books — we will import your data and show you your numbers, before you decide anything.
